SNAC International's Legislative Summit: "Unpacked and Online"

For the second year in a row, SNAC International members participated virtually in the annual Legislative Summit throughout the month of June. The Summit kicked off with a Keynote Address from Senator Rob Portman (R-OH), who provided his perspective on snack industry priorities including supply chain concerns, the potential for tax hikes, a possible infrastructure package, and labor reform. Senator Portman also answered questions from his Ohio constituents providing feedback and advice for the snack industry in 2021.

Senator Rob Portman joined by 30 SNAC members to discuss legislative priorities.

Following the Keynote Address, SNAC members met virtually with Members of Congress throughout the month to ensure that the snack industry's voice was heard on key issues such as supply chain challenges, labor and truck driver shortages and improving the recycling infrastructure. While Capitol Hill remains closed to visitors, the virtual meetings ensured that SNAC members maintain relationships and build connections with Congressional offices that represent SNAC member companies.
